

# Maximise your machine.

## TUFFTRAC Over-Tyre Tracks turn your skid steer into a tank!

Tuff Stuff's range of Razorback Over-Tyre Tracks are the most advanced in the world. Built with the same manganese-enriched steel alloy used in bucket teeth, they combine unmatched flotation, traction, and tyre protection.

### OTT RUBBER

The most versatile track, has great traction and flotation, while its rubber shoes are gentle on turf and pavement. Designed to reduce damage to roads, sidewalks, lawns driveways and gardens.

### OTT MAGNUM

The toughest track on the market, has more pushing and pulling power, especially in deep mud and sand during demolition and land clearing.

### OTT DIAMOND

Bites into mud, clay, loose rock, snow, and ice like no other type of track.

#### Multiple Pad Options

Swappable pads provide ultimate versatility and drastically reduce maintenance costs.

#### Premium Steel Alloy

Made from the most durable CM400 hardened steel that is manganese enriched.

### Performance

Provides extra traction and flotation on difficult terrains, such as mud, clay, loose rock, sand, snow, ice, turf and asphalt.

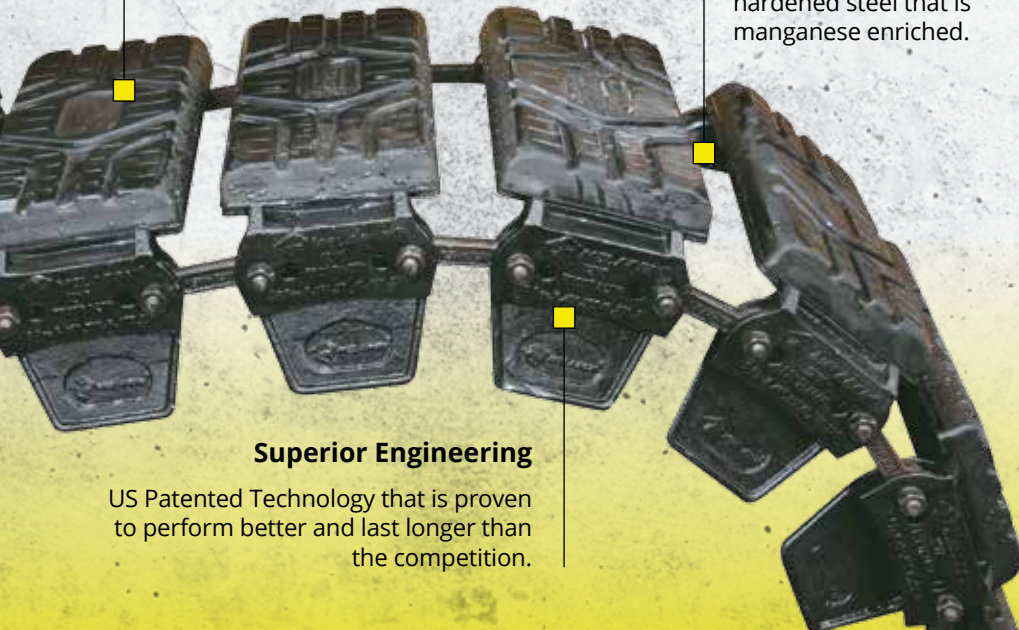

The extra weight of the tracks increases machine stability on side slopes and hilly terrains.

### Super strong

Pins and links are made of forged chromium-enriched steel for superior strength; body built from manganese-enriched steel alloy.

### Rebuildable

All wear parts are replaceable making them fully rebuildable, easy to install and inexpensive to maintain.

#### Superior Engineering

US Patented Technology that is proven to perform better and last longer than the competition.
